v1 content writes: freed (reopened) and still frozen

Commit `52ca7f6` (product decision 10, merged to `main` 2026-10-10) put `FrozenV1Content` on every v1 admin content write. Frozen writes answer **410 Gone** without running. Some of that content had no editor in v2, so no admin could change it at all. The most visible case was the home hero slider.

PR #156 (merged 2026-10-12, `e11b0bc`) **reopened 13 writes** that have no v2 editor and kept the freeze on 6 that v2 already edits. It also made `home_sliders.description` nullable: saving a slide without a description used to be a 500.

Freed: writable on v1 again (13)

v1 route	v1 controller	Called by	Why reopened	v2 editor (task)
`POST /api/v1/admin/home/sliders`	`AdminHomeController@storeSlider`	dashboard `home.api.ts:62`; frontend `lib/api/admin-home-sliders.ts:127`	v2 has no slide editor; `GET /v2/home` only reads	`/v2/admin/home/slides` (T05)
`PUT /api/v1/admin/home/sliders/{id}`	`AdminHomeController@updateSlider`	dashboard `home.api.ts:74`; frontend `admin-home-sliders.ts:132`	same	T05
`DELETE /api/v1/admin/home/sliders/{id}`	`AdminHomeController@destroySlider`	dashboard `home.api.ts:83`; frontend `admin-home-sliders.ts:136`	same	T05
`POST /api/v1/admin/what-we-offers`	`WhatWeOffersController@store`	dashboard `home.api.ts:149`	v2 edits only the section title/intro, not the items	`/v2/admin/home/offers` (T05)
`PUT /api/v1/admin/what-we-offers/{id}`	`WhatWeOffersController@update`	dashboard `home.api.ts:161`	same	T05
`DELETE /api/v1/admin/what-we-offers/{id}`	`WhatWeOffersController@destroy`	dashboard `home.api.ts:170`	same	T05
`PUT /api/v1/admin/what-we-offers/{id}/activate`	`WhatWeOffersController@activate`	— (no client call found)	same	T05
`PUT /api/v1/admin/what-we-offers/{id}/deactivate`	`WhatWeOffersController@deactivate`	— (no client call found)	same	T05
`POST /api/v1/admin/business-solutions`	`AdminBusinessSolutionController@store`	dashboard `businessSolutions.api.ts:55`	no v2 editor	`/v2/admin/business-solutions` (T05)
`PUT /api/v1/admin/business-solutions/{id}`	`AdminBusinessSolutionController@update`	dashboard `businessSolutions.api.ts:67`	same	T05
`DELETE /api/v1/admin/business-solutions/{id}`	`AdminBusinessSolutionController@destroy`	dashboard `businessSolutions.api.ts:76`	same	T05
`PUT /api/v1/admin/about-us`	`AdminAboutUsController@update`	dashboard `about.api.ts:48`	v2 can't edit the About Us image (`about_milestone_image`)	media fields in `/v2/admin/content` (T05)
`PUT /api/v1/admin/platform-train`	`AdminPlatformTrainingController@update`	dashboard `platformTrain.api.ts:29`	v2 can't edit the video URL or video image	media fields in `/v2/admin/content` (T05)

Overlap to know about: About Us and platform-training **texts** are now writable from both the v1 dashboard and `/v2/admin/content`. Publishing a v2 draft overwrites a v1 edit to the same field.

Still frozen: 410 (6)

v2 already edits this content, so these stay frozen. The matching old-client screens fail.

v1 route	Called by	Edit it in v2
`POST /api/v1/admin/blogs`	dashboard `blogs.api.ts:46`; main-front `lib/api/cms.ts:590`	`POST /v2/admin/news`
`PUT /api/v1/admin/blogs/{id}`	dashboard `blogs.api.ts:58`; main-front `lib/api/cms.ts:616`	`PUT /v2/admin/news/{id}`
`DELETE /api/v1/admin/blogs/{id}`	dashboard `blogs.api.ts:65`; main-front `lib/api/cms.ts:620`	`POST /v2/admin/news/{id}/archive` (no hard delete)
`PUT /api/v1/admin/blogs/{id}/status`	main-front `lib/api/cms.ts:627`	`POST /v2/admin/news/{id}/{submit,publish,archive,unpublish}`

v1 route	Called by	Edit it in v2
`PUT /api/v1/admin/home/settings`	dashboard `home.api.ts:96`	`PATCH /v2/admin/content/{id}` + `POST …/publish`
`PUT /api/v1/admin/cms-pages/{id}`	dashboard `cms.api.ts:22`	`PATCH /v2/admin/content/{id}` + `POST …/publish`

All v1 **reads** (admin and public) keep working; the freeze covers writes only.

Freezing them again

Freeze a route again with `->middleware(FrozenV1Content::class)` in `routes/api/content.php` once **both** are true:

1. its v2 editor is merged (T05);
2. no client still calls it. The dashboard calls 11 of the 13; the new frontend calls the 3 slider writes until C01.

When you do, move the route from `OPEN_V1_WRITES` to `FROZEN_V1_WRITES` in `tests/Feature/Content/FrozenV1ContentTest.php`.

v1 endpoints in use — who calls what, and does it work

As of 2026-10-12, `main` @ `e11b0bc` (after PR #156). Statuses are **static**: worked out from `php artisan route:list` and the route middleware, not from live calls against production.

Summary

Client	Repo path	Calls v1	Works now	410 frozen	404 no route	v2: mapped / partial / missing / obsolete
Main site	`backend/Engai-main/engai-main-front` (base `…/api/v1`)	172	167	4	1	83 / 30 / 55 / 3
Admin dashboard	`backend/Engai-main/engai-dashboard-front` (`VITE_API_BASE_URL=…/api/v1/`)	171	161	5	5	78 / 21 / 58 / 9
New frontend	`frontend/` (base `…/api/v2`)	4	4	0	0	home slides only, no v2 route yet (T05)

- New frontend: everything is v2 except the admin **Home Hero Images** tab. `frontend/lib/api/admin-home-sliders.ts` calls `/v1/admin/home/sliders` (GET, POST, POST+`_method=PUT`, DELETE). It returned 410 from 2026-10-10 until PR #156 reopened those routes on 2026-10-12.
- No other backend code calls v1. The exception is the signed download links (`ai.draft.file`, `/v1/ai/drafts/{id}/files/{file}`), which v2 responses hand out too (T13).
- Webhooks (`/api/webhooks/*`) are outside `/v1` and are not affected.
- A row is counted once per method + path. Multipart `POST` + `_method=PUT` calls are listed as `PUT`.

Broken now

Client	Method	v1 path	Caller	Why	Fix
main-front	POST	`/admin/blogs`	`lib/api/cms.ts:590`	410 FrozenV1Content	By design: edit in `/v2/admin/news` / `/v2/admin/content`. Breaks the old main-site screen
main-front	PUT	`/admin/blogs/{id}`	`lib/api/cms.ts:616` (PUT via _method)	410 FrozenV1Content	By design: edit in `/v2/admin/news` / `/v2/admin/content`. Breaks the old main-site screen
main-front	DELETE	`/admin/blogs/{id}`	`lib/api/cms.ts:620`	410 FrozenV1Content	By design: edit in `/v2/admin/news` / `/v2/admin/content`. Breaks the old main-site screen
main-front	PUT	`/admin/blogs/{id}/status`	`lib/api/cms.ts:627`	410 FrozenV1Content	By design: edit in `/v2/admin/news` / `/v2/admin/content`. Breaks the old main-site screen
main-front	GET	`/services/library-classes/dropdown`	`lib/api/vendor-workspace.ts:368`	404 no route	no v1 route; real one is `/services/classifications/dropdown`
dashboard	GET	`/admin/banks/{id}`	`banks.api.ts:20`	404 no route	no v1 route (list exists)
dashboard	POST	`/admin/blogs`	`blogs.api.ts:46`	410 FrozenV1Content	By design: edit in `/v2/admin/news` / `/v2/admin/content`. Breaks the old dashboard screen
dashboard	DELETE	`/admin/blogs/{id}`	`blogs.api.ts:65`	410 FrozenV1Content	By design: edit in `/v2/admin/news` / `/v2/admin/content`. Breaks the old dashboard screen
dashboard	PUT	`/admin/blogs/{id}`	`blogs.api.ts:58`	410 FrozenV1Content	By design: edit in `/v2/admin/news` / `/v2/admin/content`. Breaks the old dashboard screen
dashboard	PUT	`/admin/cms-pages/{id}`	`cms.api.ts:22`	410 FrozenV1Content	By design: edit in `/v2/admin/news` / `/v2/admin/content`. Breaks the old dashboard screen
dashboard	PUT	`/admin/home/settings`	`home.api.ts:96`	410 FrozenV1Content	By design: edit in `/v2/admin/news` / `/v2/admin/content`. Breaks the old dashboard screen
dashboard	GET	`/admin/home/sliders/{id}`	`home.api.ts:37`	404 no route	no v1 route; edit screen must use the list
dashboard	GET	`/admin/what-we-offers/{id}`	`home.api.ts:123`	404 no route	no v1 route (list exists)
dashboard	POST	`/auth/logout`	`auth.api.ts:35`	404 no route	no v1 route: token not revoked on logout
dashboard	GET	`/auth/me`	`auth.api.ts:39`	404 no route	no v1 route (`/auth/profile` is the real one)

Since PR #156, the old dashboard can edit sliders, What We Offer, business solutions, About Us and platform training again. It still can't edit blogs, home settings or CMS pages. Those are edited only in the new admin panel.

New frontend — `frontend/`

Method	v1 path	Caller	Screen	Works now	v2 equivalent	Task
GET	`/admin/home/sliders`	`lib/api/admin-home-sliders.ts:123`	Admin › Content › Home Hero Images	yes	`GET /v2/home` (read only)	T05
POST	`/admin/home/sliders`	`lib/api/admin-home-sliders.ts:127`	same	yes (since #156)	—	T05
PUT	`/admin/home/sliders/{id}`	`lib/api/admin-home-sliders.ts:132`	same	yes (since #156)	—	T05
DELETE	`/admin/home/sliders/{id}`	`lib/api/admin-home-sliders.ts:136`	same	yes (since #156)	—	T05

How this was built

- **Calls:** read from each frontend's API layer: `src/lib/api/*`, `server-fetcher.ts`, hooks, the AI step page, and `src/api/*.api.ts` in the dashboard. Template paths were resolved to `{param}`.
- **Works now:** the route exists on `main` and doesn't carry `FrozenV1Content`. Auth, permissions and data aren't checked, so a "yes" can still fail for a user without the permission.
- **v2 status:** from `02-v1-v2-survey.md`.
